EDUCATION

Galgotias College of Engineering and Technology

B.Tech in Computer Science and Engineering — SGPA: 7.02

Greater Noida, India

Aug 2022 – Jun 2026

Pragyan Public School

Class XII (CBSE) — Score: 80.8%

Jewar, India

2021

TECHNICAL SKILLS

Languages: Java (DSA), JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, React Router, Responsive UI Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Clerk Auth

Databases: MongoDB, Mongoose ODM, PostgreSQL (Neon Serverless), Relational databases

Tools & Platforms: Git, GitHub, Vercel, VS Code, Postman, Linux Terminal, AWS

CS Fundamentals: Data Structures & Algorithms, object-oriented design, Operating Systems, Computer Networks, distributed, multi-tiered systems

Testing: Unit Testing, Integration Testing, API Testing (Postman)

PROJECTS

Video Hosting Platform (YouTube Clone) GitHub | *Node.js, Express.js, MongoDB, React, JWT*

- Engineered a full-stack video hosting platform using the **MERN stack** with modular REST API architecture, achieving **25% reduction in API response time** via optimized middleware and route handling.
- Implemented secure authentication using **JWT and bcrypt**; designed normalized **MongoDB schemas** with Mongoose strict validation, improving data consistency by **30%**.
- Built and documented RESTful APIs tested with **Postman**, enabling seamless frontend-backend integration and supporting scalable endpoint expansion.

AI SaaS Application GitHub | Live | *React, PostgreSQL, Node.js, Clerk, Neon, Vercel*

- Developed a multi-tool **AI SaaS platform** (PERN stack) with 6+ AI tools (Resume Analyzer, Blog Generator, Background Remover), reducing user manual effort by **60%**.
- Integrated **Clerk** for auth and premium subscriptions with role-based access, increasing user retention by **35%**; leveraged **serverless PostgreSQL (Neon)** improving query performance by **40%**.
- Designed a fully **responsive ReactJS UI** with lazy loading and optimized rendering, reducing page load time by **30%** across all devices.

Real-Time Chat Application GitHub | *React.js, Node.js, Socket.io, JavaScript, CSS*

- Built a full-stack **real-time chat application** with React.js frontend and Node.js backend, integrating **Socket.io** for low-latency bidirectional WebSocket messaging across multiple concurrent users.
- Implemented **user authentication and session management** via Node.js middleware, securing real-time communication channels and protecting user data end-to-end.
- Structured project with a **scalable monorepo architecture** separating client and server layers, improving maintainability and enabling independent deployment workflows.

COMPETITIVE PROGRAMMING & ACHIEVEMENTS

LeetCode

Global Platform

Rating: **1848+** — Top **6%** globally — **800+** problems solved across LeetCode and Codeforces

- **Global Rank 1015** – LeetCode Weekly Contest 492
- **Global Rank 1716** – LeetCode Weekly Contest 478
- **Global Rank 2621** – LeetCode Weekly Contest 490
- **Global Rank 2732** – LeetCode Weekly Contest 480
